DESIGNA Verkehrsleittechnik GmbH:

Allee Shopping Complex and Business Centre in the heart of Budapest

As the only international parking management system provider with a subsidiary in Hungary, DESIGNA is equipping the car park located in the former Budai Skala Center with the latest technology.

Kiel, 4th February 2009: The historical city has witnessed unstoppable growth in recent years. Furthermore, city planners react to the Hungarians's growing willingness to consume and therefore one shopping mall after the other is currently inaugurated in the city centre.

With the 'Allee' project on the former Budai Skala premises, the international investor ING Real Estate combines shopping, living and working in the heart of Budapest. With the PM ABACUS system DESIGNA can meet the high quality demands of this project as they have done before for various other malls in Budapest.

"The new garage will host just under 1200 parking spaces", explains Michael Gradnitzer, DESIGNA's area manager for projects in Eastern and Central Europe. "The project includes the installation of a networked PM ABACUS system with a range of additional features, such as automatic LPR at four entrance and six exit points to facilitate the car park use for the numerous regulars and inhabitants.", states Gradnitzer. "In addition, the clients will be quickly directed to free parking spaces with the help of a modern parking management system, which can also register the single parking spaces."

Eleven automatic pay stations ensure straightforward procedures, regular clients can easily re-charge their debit cards and pay later.

Offices: 7,000 m²

About DESIGNA:

DESIGNA Verkehrsleittechnik GmbH develops, produces, installs and maintains fully automatic parking management systems – worldwide. Over 6,000 DESIGNA systems are in operation in more than 55 countries every day. And almost every working day somewhere in the world another two are added to this number. The range of systems covers individual parking garages to integrated, intelligent system solutions that administer thousands of airport parking spaces or are networked across cities.
